## 5. Soap manufacturing business ideas

This low investment manufacturing business is an evergreen type business. people use soap on daily basis either for bathing or for washroom purpose.

the most interesting thing about this small manufacturing business ideas is the availability of raw material. countries like **America don't have raw material** so they generally **import soap** from countries like India.

so it's a great opportunity. you will earn more from exporting product because countries like America have a better economy than ours. so you will earn so much from these low investment manufacturing business ideas.

But there is one difficulty in this manufacturing business ideas. people generally use branded soap like hindustanUnilever, Patanjali, pears, Dettol, Liril, Lux etc

you can overcome this difficulty with the more better marketing technique like selling product at very low cost, selling it in rural areas, selling it online on Amazon, Flipkart big basket and many other e-commerce platforms to outreach crores of the customer while sitting in the office.

you can also make the product for branded companies like Dettol, Pears but its little bit tough. you should give it a try. talk to the different brand and tell them I want to make the product for you. generally, they give permission to those whom they know to avoid low quality.

you just heard about **Patanjali** it was started in 2006 but now it is in the top 10 FCMG companies. it recently entered into soap market also and making tons of money from it. **All I want to say is** you can make the market if you really work hard and apply better marketing technique
